

CLAIMS

What I claim as my invention is:

1. A television picture or image enhancing system comprising:

a device which varies or allows the variation of the perception as in a prescription for vision of the pictures or images on or from a television screen,

2. The television picture or image enhancing system described in Claim 1, wherein the vision prescription may not vary,

3. The television picture or image enhancing system described in Claim 1, wherein the system may be attached directly to a television,

4. The television picture or image enhancing system described in Claim 1, wherein the system may not be attached directly to a television,

5. A television picture or image enhancing system comprising:

a device which varies or allows the variation of the perception as in a prescription for vision of the pictures or images on or from a television screen through broadcasted television signal manipulation,

6. The television picture or image enhancing system described in Claim 5, wherein the vision prescription may not vary.

7. The television picture or image enhancing system described in Claim 5, wherein the system may be attached directly to a television,

8. The television picture or image enhancing system described in Claim 5, wherein the system may not be attached directly to a television,

9. A television picture or image enhancing system comprising:

a television screen which may exist alone as a prescription television signal receiver and viewing surface only.
